Reported: 08/30/2019.</p> <p>The RP stated that during normal accounting procedures he discovered \$100.00 in US currency was missing from one of the vending machines. The RP believes that the theft occurred between 07/29/2019 and 08/13/2019.</p> <p>This machine is on the west side of the building and is accessible by customers from the outside of the business and serviceable by employees from inside of the business. The RP reviewed security camera footage from the outside of the business and was able to determine that the machine had to be accessed from inside of the business rather than from the outside. There are no cameras covering the inside portion of the machine.</p> <p>There have been issues in the past with employee theft from this machine. Due to the prior thefts, management placed a hasp and padlock on the machine to prevent entry. The RP believes that the suspect used tools to remove nuts and bolts that kept the hasp secured to the machine because the RP found the nuts and bolts loose upon inspection. Since the theft management welded the bolts to prevent this method of entry. No evidence was located at the scene and no suspect information is available at this time.</p>	WARD, M. R.
